

## Your Comfort & Relaxation Plan

A calm, premium approach to help anxious implant patients feel safe, supported and fully prepared for treatment.

Take exactly as prescribed by your dentist

Attend with a responsible adult escort

No driving or alcohol after medication

### You will not be judged here.

We use this plan to help you feel calm and comfortable before advanced implant treatment. It is part of the carefully designed patient experience at Smile Success.

#### Smile Success Team

Warm, supportive care from first call to treatment day

### What this medication is for

Lorazepam may be prescribed to reduce anxiety before dental implant treatment. It is designed to help you feel more relaxed and settled before you arrive.

### What you may notice

- You may feel calmer and less tense
- You may feel drowsy or light-headed
- You may remember less of the procedure - this can be normal
- You should plan for a quiet, restful day afterwards

### Before you attend

- Take the tablet 1 hour before your appointment
- Swallow with water
- Take only the dose prescribed for you

### Escort requirement

- Bring a responsible adult aged 18+
- They must take you home
- They should remain with you for 4-6 hours

### After treatment

- Do not drive
- Do not drink alcohol
- Do not work, sign documents or make important decisions
